PART- II

ENGLISH

Section- A

(Reading Comprehension)

Direction: Read the passage and answer the questions that follow :

The modern curriculum, while attempting to address the demands of the 21st century, is not without its criticisms. One prominent concern is the growing emphasis on technological literacy at the expense of foundational Knowledge. Critics argue that an overreliance on digital skills might compromise traditional academic disciplines, leading to a potential gap in fundamental understanding. Another critique revolves around standardized testing within the modern curriculum. The focus on assessment often results in a "teach to the test" mentality, where educators may prioritize exam preparation over fostering a genuine understanding of subjects. This approach tends to stifle creativity and critical thinking, as students may become more focused on memorization than on applying knowledge to real-world scenarios.

Furthermore, the fast-paced integration of technology into the curriculum raises questions about equality. Not all students have equal access to digital resources, creating a digital divide that could exacerbate existing educational inequalities. The assumption that all students can seamlessly adapt to a technology-driven curriculum might overlook socio-economic disparities and hinder inclusivity.

In the pursuit of interdisciplinary learning some critics argue that the modern curriculum risks diluting subject depth. By attempting to cover a broad range of topics, students may lack the in-depth understanding necessary for specialized fields, potentially hindering their ability to pursue advanced studies of careers in specific disciplines.

Choose the most appropriate alternatives:

1. Modern curriculum of the 21st century.....

- A. is a combination of technological skill and fundamental understanding of a subject.
- B. builds on the foundation of fundamental knowledge with technological support.
- C. is trying to make up the gap between technology and its fundamental knowledge.
- D. may disturb the equilibrium of fundamental knowledge and technological Knowledge.

2. "Standardized testing system' of modern curriculum would help.

- A. to promote creativity among the students.
- B. to hinder critical understanding of subjects.
- C. to focus on memorization instead of application.
- D. to apply the knowledge of technology in real world scenarios.

3. Integration of technology into the curriculum disdains

- A. minimisation of educational inequalities
- B. socio-economic discrepancies of students and their inhibition of inclusivity.
- C. socio-economic balance in academics.
- D. seamless adaptation of modern technology in education.

4. Too much focus on inter-disciplinary learning lacks student'

- A. overall knowledge in different subjects
